

Lower Allen Township's

# Guide to MS4

Municipal Separate Storm Sewer System

December 2025 Edition

## ***Lower Allen Township Stormwater Authority Receives PMAA Award***

In September, Lower Allen Township Stormwater Authority was recognized for the Partnerships they have built since their inception in 2018. LATSA, with the assistance of Lower Allen Township staff, have built strong relationships with property owners, volunteers, businesses, other municipalities, and the Yellow Breeches Watershed Association to complete required Pollution Reduction Plans for the Township MS4 Permit and to improve infiltration and conveyance of stormwater in the Township. Whether those projects have been stormwater structural improvements in advance of paving projects, retrofitting preexisting stormwater basins, or creating pollinator habitats; the Stormwater Authority and Township staff have worked to create functional and educational features around the municipality with the assistance of numerous partnerships.
