## ***Not all Landfills are Created Equal***

In Pennsylvania, approximately 9.6 million tons of waste is generated each year. That is 1480 pounds of trash per person every year! All of that trash has to go somewhere when it leaves your curb, most of which is sent to a landfill. There are 46 landfills in Pennsylvania; but not all accept municipal trash, while others do not accept certain items. Items typically banned from landfills include yard waste, electronics, hazardous waste, tires, lead-acid batteries and even recyclable materials.
